**AI HARDWARE
& EDGE AI
SUMMIT**

SEPTEMBER 2023 | SANTA CLARA, CA

**WHAT WERE YOUR MAIN
OBJECTIVES BEHIND ATTENDING?
WERE THEY MET?**

I wanted to learn more about the innovations in the Hardware space for specific AI workloads and my interactions with companies in their booths were very fruitful and provided me a great insight into the lay of the land.

**WERE YOU ABLE TO CONNECT
WITH LIKEMINDED COLLEAGUES
AND NEW INDUSTRIES?**

Yes - this was an amazing summit with very relevant sessions, content, leaders, and companies. I enjoyed the Keynote by Andrew Ng and learned about his perspective and vision for AI.

**WHAT WAS YOUR KEY TAKEAWAY
FROM THE EVENT?**

Software alone will not propel AI. There is a need to design massively parallelizable and cost-effective hardware to run on-premise or on the cloud for enterprises to fully leverage the advantages of AI.

“ There is a need to design massively parallelizable and cost-effective hardware... ”
