AI HARDWARE & EDGE AI SUMMIT

SEPTEMBER 2023 | SANTA CLARA, CA

“ we are currently in a new era for the new hardware architecture paradigm...”

WHAT WERE YOUR MAIN OBJECTIVES BEHIND ATTENDING? WERE THEY MET?

The main objective for me was to understand what is currently happening in the AI hardware industry. What are the interesting products that other companies are making - to get inspiration. These objectives were met by talking to various people and the great speeches in the event.

WERE YOU ABLE TO CONNECT WITH LIKEMINDED COLLEAGUES AND NEW INDUSTRIES?

I was able to chat and connect with all kinds of people ranging from working in AI infrastructure to AI chip.

WHAT WAS YOUR KEY TAKEAWAY FROM THE EVENT?

The key takeaway for me is that we are currently in a new era for the new hardware architecture paradigm, specifically designed for AI like what we had for CPU and GPU. We are just at the start of the movement, and I am excited to see how it will develop and what will end up being the winner.
