

2021

SPONSORSHIP PROSPECTUS

PATHFINDING & PARTNERSHIPS FOR THE
TECHNOLOGY VANGUARD

“The AI Hardware Summit is a great place where lots of people interested in AI Hardware are coming together and exchanging ideas, and together we make the technology better. There’s a synergistic effect at these summits which is really amazing and powers the entire industry.”

John L. Hennessy, Chairman, Alphabet

**SHOWCASE YOUR
THOUGHT LEADERSHIP**
and your technology/service to a room
filled with potential buyers/partners

**BOOST YOUR BRAND
RECOGNITION**
and competitive market presence
within a network of over 25,000 active
members

BUILD YOUR NETWORK
of existing and new potential clients and
develop a solid sales pipeline

**BENCHMARK YOUR
OFFERING**
against what other experts are working
on in the space

INTRODUCTION

The computing industry is on the cusp of a paradigm shift. An ever-growing prevalence of data is converging with new techniques and technologies to gather and process it, to extract the value held within. Driving this paradigm shift are technologists - inventors, engineers and architects - who are equipping humanity with tools to solve its most pressing problems, answer its most elusive questions, and achieve its most ambitious goals. We put these inventors and architects at center stage of the technological revolution, and help them achieve the full potential of their work.

We offer a multi-faceted approach to content, research, events and media services, and act as an extension to marketing and business development teams with our partners.

We can help companies couple commercial objectives alongside the development of product and market knowledge - if you want to reach the technologists changing the world, we are here to help.

For questions regarding exhibition, digital and sponsorship opportunities, contact:

Ben Edwards | Commercial Partnerships Director

NEW EVENTS FOR 2021

AI SYSTEMS SUMMIT RESEARCH

30-31 MARCH 2021

BRINGING TOGETHER AI RESEARCHERS & SYSTEMS
ENGINEERS FROM RESEARCH INSTITUTIONS WORLDWIDE

Attend to meet researchers working on the same challenges as you in an hour of dedicated networking time on each day. There will also be an opportunity to meet and hear from some of the leading AI Hardware technology providers

On the HPC side, the summit will cover topics such as the convergence of HPC & AI, heterogeneous systems design, and the application of AI hardware to non-AI HPC workloads. On the Edge device side, the summit will look at design & engineering challenges for robotic systems, and neuromorphic and brain inspired systems.

Join engineers, architects, and researchers from across the globe who are working at the forefront of AI systems, for two mornings dedicated to unpicking the challenges of adopting AI acceleration technologies.

FIND OUT MORE

AI SYSTEMS SUMMIT INDUSTRY 4.0

8-9 JUNE 2021

THE ECOSYSTEM EVENT FOR AI TECHNOLOGISTS IN
MANUFACTURING AND INDUSTRY 4.0

Dive deep into end-to-end AI acceleration & systems design in a specific vertical, while also engaging with cutting edge work on software for AI acceleration.

Understand the dual landscape of AI systems and solutions builders, and Industrial IoT, IT & OT professionals at end user manufacturing companies.

Identify emerging technologies and best practices for increasing the performance, autonomy and efficiency of intelligent systems in industrial contexts.

FIND OUT MORE

SOFTWARE FOR AI OPTIMIZATION SUMMIT

8-9 JUNE 2021

AI OPTIMIZATION AT THE SOFTWARE LEVEL FOR CLOUD
AND EDGE AI

200+ attendees: 30% Edge Devices, 30% Software Solution Providers, 20% AI Hardware Vendors, 10% Cloud Companies, 10% Academic and Research Institutions.

Understand key topics including how to integrate software for AI optimization with various AI hardware and machine learning frameworks; and explore roadmaps to industry deployment, market, and commercialization.

Learn how to identify, deploy and integrate these techniques and software into your workflows and connects people working across MLOps with the latest innovations, benchmarks, and use cases.

FIND OUT MORE

14-16 SEPTEMBER 2021 | MOUNTAIN VIEW, CA

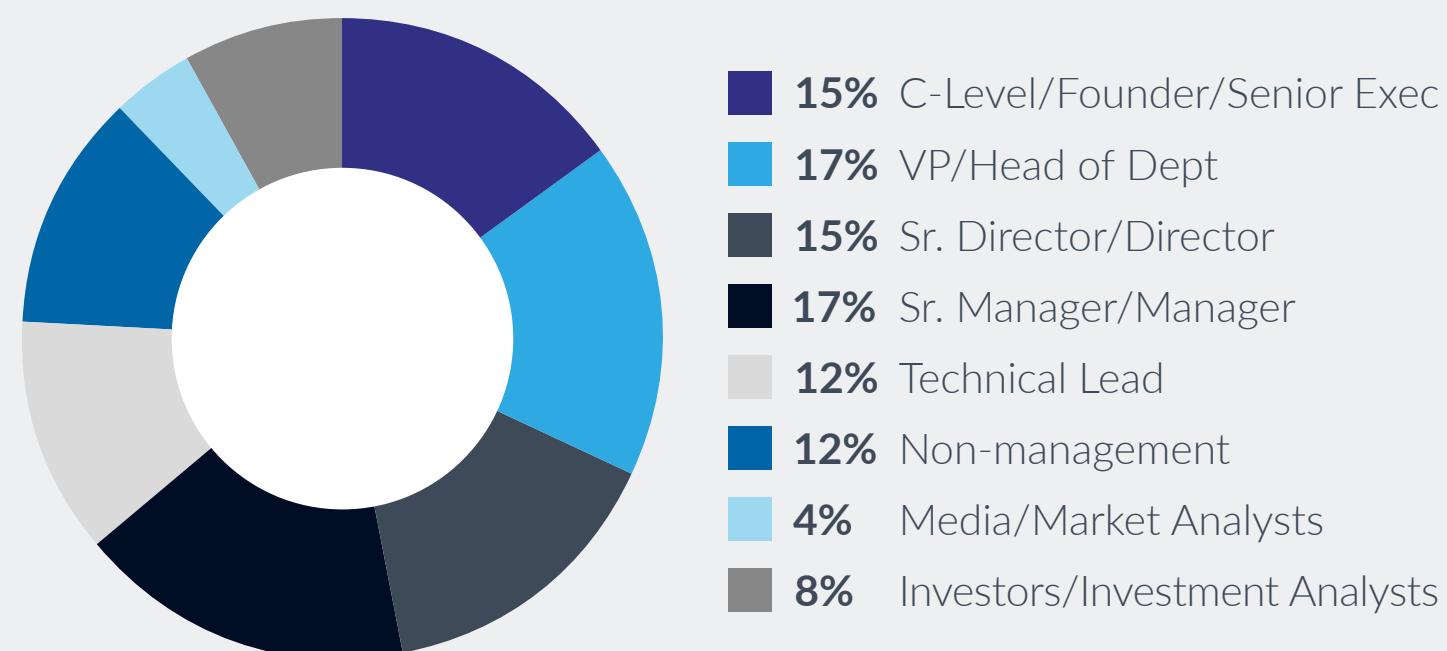

THE INDUSTRY EVENT FOR THE AI HARDWARE ECOSYSTEM

- ✓ **Luminary Keynotes:** In 2020 we saw unique perspectives from industry luminaries such as Turing Award Winner David Patterson, and venture capital pathfinder and computer hardware industry veteran, Khosla Ventures. Returning 2019 AIHW Summit luminary Lip-Bu Tan, CEO of Cadence Design Systems.
- ✓ **Innovations and Optimizations of Silicon & Systems for AI Training & Inference:** Product launches & deep-dives from C-level executives in the AI Hardware industry. Previous launches included Habana Labs.
- ✓ **Optimizing Machine Learning Systems:** Hyperscaler perspectives on designing & engineering bleeding-edge AI systems, from hardware through software. ML system co-design and protecting compute performance gains by eliminating system-level inefficiencies.
- ✓ **Inference in Client (Edge) Computing:** Applications for AI accelerators in cameras, consumer electronics, autonomous vehicles etc.
- ✓ **Beyond Compute:** AI's Impact on memory, storage & networking: Innovations in HBM, on-chip memory and NVM, I/O bottlenecks, data transfer & high-speed interconnects.
- ✓ **Managing Machine Learning Models at Scale:** Machine Learning hardware robustness & reprogrammability, model standardization & interoperability.

“The AI Hardware Summit exceeded our expectations! The quality of the sessions, attendees and management of the event were superior. Having 1 auditorium for all of the sessions enables attendees to attend all of the sessions without having to choose between two session being presented at the same time. Given all of this we plan on participating in the next Summits internationally.”

Mathilde Karsenti, Marketing Programs Manager, Mentor, A Siemens Business

12-13 OCTOBER 2021

BUILDING THE QUANTUM COMPUTING ECOSYSTEM

✓ Networking First

Save time finding your next industry or research partner - read their custom profile, send an invite, connect! Our platform & format gives total visibility and in-depth information on attendees. No more lonely virtual events!

✓ QC Foundations

Form industry-defining partnerships that will enable growth and scale in the QC industry, to stay ahead of your competition. Learn about the dynamics of successful industry partnerships and what makes them tick.

✓ Engineering Large Scale Systems

Source the technology partners you need to eliminate engineering bottlenecks and barriers to scale. What stands in the way of systems with 100,000s to millions of qubits? These conversations need to happen now!

✓ The Supply Chain Roadmap

Identify QC component and materials suppliers, and hear how they can help solve challenges in manufacturing & fabrication - help the QC industry become a competitive marketplace.

EDGE AI SUMMIT

16-17 NOVEMBER 2021 | MOUNTAIN VIEW, CA

THE INDUSTRY EVENT INTERFACING EDGE COMPUTING AND ARTIFICIAL INTELLIGENCE.

Build key partnerships with Featured Speakers: global audience of CEOs, CTOs, engineers and architects from leading edge infrastructure providers, telcos, tech and enterprise companies.

Translate edge data into revenue - learn from real-world hardware and software edge case studies across the sensor, device, network and server edges.

Overcome design & engineering bottlenecks by understanding how others are deploying technology in resource-constrained environments.

Stay ahead of investment trends across Edge AI with insights on where money is being spent, and why, in light of COVID-19.

BRAIN INSPIRED COMPUTING CONGRESS

16-17 NOVEMBER 2021

BRIDGING THE GAP BETWEEN RESEARCH AND COMMERCIAL
APPLICATION OF 'BRAIN-INSPIRED' TECHNOLOGIES.

Define an industry: Meet Featured Speakers: partner with the leading startups, industry R&D enterprise, government in brain-inspired computing. Push forward the state of the art for technologies inspired by the brain.

Learn from peers: Uncover how brain-inspired methods intersect with conventional deep learning. Fundamental research and industry will come together to validate the commercial application of these technologies.

Assess alternative architectures: Explore new brain-inspired hardware and software specifically targeting applications which demand low power, low latency and local learning. application layer.

2021 SPONSORSHIP PACKAGES

		HEADLINE (1 AVAILABLE)	PLATINUM	GOLD	EVENT	EXHIBITOR
SPEAKING OPPORTUNITIES	• Opening Day 1 solo speaking slot (post Luminary)	✓				
	• Solo Keynote Speaking Slot (Day 1 or Day 2)		✓			
	• Moderator OR Pannelist position on keynote panel session	✓	✓			
	• Keynote recorded and shared with sponsor	✓	✓			
	• Solo Track Speaking Slot	✓		✓		
	• Moderator OR Pannelist position on in track panel session				✓	
	• Sponsor able to run round table sessions	4	3	1		
	• All content is available both live and 'on-demand' post event	✓	✓	✓		
TECHNICAL WORKSHOP	• Sponsor to host 45 minute briefing/workshop for target profile audience – curated and invited by Kisaco Research	✓	✓			
MARKETING PROMOTION	• Logo to be position in top 1/3 of event website, next to event logo as "headline partner"	✓				
	• Listed on event website/app/virtual platform and all collatral as event sponsor	✓	✓	✓	✓	✓
	• Sponsor to feature on pre-event webinar as part of build up campaign	✓	✓			
	• Option to tie-in any sponsor announcements with our campaign – to co-promote	✓	✓	✓	✓	
	• Opportunity to have a white paper/research paper available to download from event website – promote through marketing campaign – if appropriate	✓	✓	✓	✓	
	• Sponsor can supply content downloadable via virtual platform for all attendees with lead capture (eg whitepapers/tech spec/demo videos)	✓	✓	✓	✓	✓
	• Pre event speaker interview promoted via event marketing campaign	✓	✓			
	• Social Media Postings	8	6	2		
	• Pre or post event HTML email	✓				
ONSITE BRANDING	• Exchanced brand positioning at event and on virtual event platform	✓	✓			
	• Standard brand positioning at event and on virtual event platform			✓	✓	✓
EXHIBITION, MEETING ROOMS & NETWORKING	• 6ft table top booth & Space for branded backwall	✓	✓	✓	✓	✓
	• Inclusion in Demo Exhibiton Demo Tour	✓	✓	✓		
	• Private Meeting Room provided for sponsors use (2 days)	✓				
	• Sponsor of Day 1 end of day drinks reception	✓				
VIP MEETING SERVICES	• Abilty to supply wish list for Kisaco Research to invite customers and prospects on your behalf with discounts and incentives	✓	✓			
	• Priority access to attendee list and on-line meeting scheduler for sponsor to arrange additional meetings at events	✓	✓			
PREMIUM ATTENDEE PASSES	• Full Access conference passes	10	8	4	2	2
	• Discount for additional passes for partners/clients/prospects	20%	20%	15%	10%	10%
ADDITIONAL BENEFITS	• 10% off Kisaco Research Tech Reports/Intelligence/Marketing Services	✓	✓			
	• Onsite Video Interview	✓	✓	✓		
	• Pre evnent access to press & analyst list (4 weeks out)	✓	✓			

Kisaco Innovation Radar Pioneer 2021

In 2020 we added our analyst capability, headed up by our Chief Analyst Michael Azoff, and launched the world's first AI chip comparison charts, and the first of our Kisaco Leadership Charts (KLCs). We learnt a lot from the process and will be revisiting the reports again this year, with an even more rigorous methodology and with more vendors. Get in touch if you want to be involved.

Participation in the reports is an invaluable way to generate independent and objective, critical analysis on your product and company, and to see how you rank against competitors. A number of participating vendors have licensed their profiles in the report to arm their salespeople with competitive intelligence and to help customers understand their products. Some have chosen to license the material for use in fundraising.

This year, we will be adding new vendor comparison reports to our AI Hardware Accelerator KLC suite, including 'Neuromorphic AI Hardware Accelerators' and 'AI Software Accelerators', alongside a number of other enterprise IT focused reports.

For more information on how we evaluate and compare vendors, watch these presentations from our Chief Analyst Michael Azoff

ABOUT OUR CHIEF ANALYST

Michael Azoff PhD, MSc, BEng.
Chief Analyst
Kisaco Research

With over 17 years analyst experience, most recently at Ovum/ Informa, Michael Azoff joined Kisaco Research in 2020 as Chief Analyst.

HQ'd in Kisaco Research's London office, Michael's launched Kisaco Research vendor product comparison reports with the new Kisaco Leadership Chart (KLC) analyst chart. The first KLC is also the first analyst chart in the AI chip industry, with 16 vendors having participated in the research.

In his career Michael worked at Rutherford Appleton Laboratory building simulators for electron and hole transport in semiconductors for UK national and European community research projects and published papers in learned journals. He then turned to building neural networks and created a startup selling his Prognostica Microsoft Excel add-in for time series forecasting, and wrote a book on the topic for publisher John Wiley & Sons in 1994.

Since 2003 Michael has worked as an IT industry analyst covering software engineering topics, from agile and DevOps, to application lifecycle management and cloud native computing. He started covering machine learning when deep learning emerged as the most recent wave of interest in AI and left his position as Distinguished Analyst at Ovum/Informa to join Kisaco Research and help build an analyst capability within the company.
