

SPEAKER & PARTNER SPOTLIGHT

Matthew Burns

Global Director, Technical Marketing

Samtec

- **Explain your session in more detail.**

From increased data throughput and power requirement to flexibility, scalability and density, AI hardware architectures are ever changing. In our session, Samtec will present bleeding edge copper, optical and RF interconnect solutions optimizing generative AI performance real-time.

- **Why did you chose to partner with this event again?**

The AI HW/Edge AI Summit is a leading event for networking, education and thought leadership within the fast-growing AI HW ecosystem. Attendees, speakers and sponsors are literally a who's who of leaders in AI HW and Edge AI system architecting and design. We NEED to be here.

- **What you are most looking forward to**

Keeping a pulse on where the AI industry is going. There is so much innovation ongoing at faster rates, its frankly difficult to stay on top of it all. The AI HW/Edge AI Summit is essential and taking a pulse of AI HW design and system architecting.
